Didier De Buyst

Value Creator in Industry ("ad veram aestimationem creandam")
Antwerp Metropolitan Area

Summary

Didier De Buyst combines his engineering background with a thorough knowledge of corporate finance, a knack for strategic thinking and a clear vision of the technological future. He is able to analyze and decode problems swiftly and accurately, and has the tenacity and courage to subsequently implement the right solutions. This unique combination has been a crucial factor in all of his professional achievements.

For nearly 30 years, Didier has served as a board member for various organizations, including large commercial companies, public institutions and research centers. He has guided them through some of the most critical phases of their existence. As a board member of Belgacom (now Proximus), he helped the company successfully tackle several profound challenges, including the liberalization of the telecom market, the advent of broadband and the company's IPO. He focuses on long-term assignments, either as a member of the board itself, or as part of an advisory board or strategic committee.

His own company Veritas per Scientiam resolves industrial disputes. He has built a strong reputation in this field and is particularly known for his ability to look beyond the purely legal perspective. The aim is to provide companies with a solution that is timely, correct and economically sound, always keeping a keen eye on the business side of things. Didier has been a certified mediator since 2013.

Didier specializes in complex engineering projects in the domain of civil engineering, building, infrastructure and large industrial installations. His experience in strategic business management and corporate finance allows him to take a holistic view on project management. He is able to align the different disciplines toward a common goal and understands the impact of crucial factors to anticipate problems before they escalate.

Finally, Didier is active as visiting professor at Hasselt University.

Experience

Veritas per Scientiam

30 years 10 months

Creating Value during Business Conflict Resolution

January 1993 - Present (30 years 10 months)

Veritas per Scientiam assists industry in avoiding and resolving industrial and technical disputes. Our unique combination of technical and business expertise enables us to look beyond the purely legal perspective and find a timely and economically sound resolution.

Focus on technical and industrial disputes

Veritas per Scientiam focuses on avoiding and resolving technical and industrial disputes—typically those related to engineering—which involve property damage or business interruption. We combine a thorough engineering background with long-standing experience in business matters, including Corporate Finance.

We handle disputes between companies and their suppliers, contractors and other business partners, or within the company itself, including disputes between business units, departments, shareholders and other stakeholders.

Keeping a keen eye on business

Legal disputes create financial and economic uncertainty for all parties involved. More often than not, they lead to long, drawn-out procedures and large legal fees, with a result that benefits neither party. Considerable time and economic value are wasted. Perhaps more importantly, future collaboration between parties is often severely jeopardized.

Veritas per Scientiam helps to resolve disputes in a more effective manner. We always keep a keen eye on the business side of things and take into account all economic consequences. We provide companies with a solution that is timely, correct and economically sound. Our aim is to create true value during the business conflict resolution: *ad veram aestimationem creandam*.

Certified Mediator

October 2013 - Present (10 years 1 month)

Certified mediator in Belgium for civil and commercial matters. See www.mediation-justice.be/ (French and Dutch).

SCK CEN

14 years 8 months

Chairman of the MYRRHA Supervisory Group

October 2021 - Present (2 years 1 month)

Brussels Metropolitan Area

Vice Chairman of the Board of Governors of the Belgian Nuclear Research Center

October 2021 - Present (2 years 1 month)

Brussels, Brussels Region, Belgium

"Do not underestimate the power of atoms: nuclear applications can make a difference. Now and in the future. This is why as one of the biggest research centres in Belgium we continue to perform research into them"

Director (Member of the Board of Governors)

March 2009 - Present (14 years 8 months)

Mol/Brussels

Appointed as Director (Member of the Board of Governors) of SCK-CEN, the Belgian national nuclear research facility, one of the world leaders for material testing, research on Generation IV nuclear reactors, production of radio isotopes (mainly in the BR2 reactor). See: www.sck.be/en

Member of the MYRRHA Supervisory Group

December 2010 - Present (12 years 11 months)

Brussels Area, Belgium

The MYRRHA Supervisory Group is a subgroup of the SCK•CEN Board of Directors that periodically reviews and assesses the status, related risks and strategic opportunities of the MYRRHA project in co-operation with the MYRRHA Management Team. The MYRRHA Supervisory Group provides recommendations to the Board of Directors on project management, organisational and technological issues related to MYRRHA.

MYRRHA project (> 1 billion € investment): <https://myrrha.be/>

Member of the Finance Committee

November 2009 - October 2021 (12 years)

Brussels

The Financial Committee reviews annual accounts of the company and performs regular audits concerning financial and other risks. The Committee does also preparatory work to assist the Board of Governors in all aspects of Corporate Finance (investments, acquisitions, disposals, write-offs, etc.).
